I started the very first entrepreneurship club in the UoP. Instead of re-inventing the wheel, I became member of Mind-space, a student Entrepreneurship/Innovation NPO and I was responsible for the expansion to Patras. I also work closely with the office of Entrepreneurship and Innovation so as to stimulate the student community and upgrade the university stance towards entrepreneurship.

Making is my passion, that's why I started developing a personal smart-home assistant, making my decades old apartment "smart" by controlling various appliances/lights/doors. This project has been also presented at ECESCON as my first paper. Furthermore, I constantly try to hone my people and communication skills as I firmly believe that social skills are critical a paper. I to success.

Lastly, I am determined in achieving what I set my mind onto. Being passionate and diligent, I strive to be as productive as possible with things that motivate me.

EXPERIENCE
