odyslam.me

I focus on solving problems that affect the quality of everyday life and empowering people through technology. I believe that Initiative, Creativity and Ambition are the key to success. As one needs to contest any opportunity that arises, find the most efficient solution and aim to become the best at what he does.

I started the first entrepreneurship club in the UoP by becoming member of Mindspace, a NPO that promotes entrepreneurship in the university, founded the Patras Chapter and have worked closely with the university office of Research & Innovation. Moreover, I participated in MIT Bootcamp on I&E 2018 and ran a crowdfunding campaign called "Odyssey to MIT", raising over 10K euro in 4 weeks.

Making is my passion, that's why I developed a personal smart-home assistant converting my old apartment into a smart-home. I now focus on projects that interconnect the IoT, Blockchain and Agtech fields.

Lastly, I exercise and constantly hone my people skills to support my anthropocentric approach to life.
