I chose to study Electrical Engineering because I was always keen in programming and electronics. My interest lies mostly in microprocessors, IoT and machine learning.

As a huge enthusiast of entrepreneurship, I started the very first entrepreneurship club in the UoP. Instead of re-inventing the wheel, I became member of Mindspace, an entrepreneurship club at NTUA and I was responsible for the organisation's expansion to Patras, coordinating a team of 3 members and hosting numerous events so as to present entrepreneurship as an option to students.

Making is my passion, that's why I started developing a personal smart-home assistant, making my decades old apartment "smart" by controlling various appliances/lights/doors. Furthermore, I constantly try to hone my people and communication skills as I firmly believe that social skills are critical to success.

Lastly, I am determined in achieving what I set my mind onto. Being passionate and diligent, I strive to be as productive as possible with things that motivate me.
